

WHY DO WE NEED A DATABASE TO STORE DATA?

LET'S TAKE A REAL WORLD EXAMPLE OF AN
INFORMATION SYSTEM - WE PLACE TREMENDOUS
DEMANDS ON SUCH A SYSTEM

ALL OF THESE HOLD DATA

SAY YOU'RE PLANNING TO SET UP A
LARGE E-COMMERCE SITE... KIND OF
LIKE FLIPKART OR AMAZON

THERE IS A LOT OF TECHNOLOGY
BEHIND RUNNING A GOOD E-
COMMERCE SYSTEM

THE WEBSITE OR THE
MOBILE PHONE APP

ORDER MANAGEMENT SYSTEMS

SELLER SYSTEMS TO
ONBOARD NEW
MERCHANTS

THE SEARCH SYSTEM

RECOMMENDATIONS

CART, CHECKOUT
AND PAYMENT

LOGISTICS SYSTEMS

THE CATALOG OF
PRODUCTS

ORDER MANAGEMENT SYSTEMS

THESE ARE CORE PIECES YOU INTERACT WITH EACH TIME YOU BUY ON AN E-COMMERCE PLATFORM

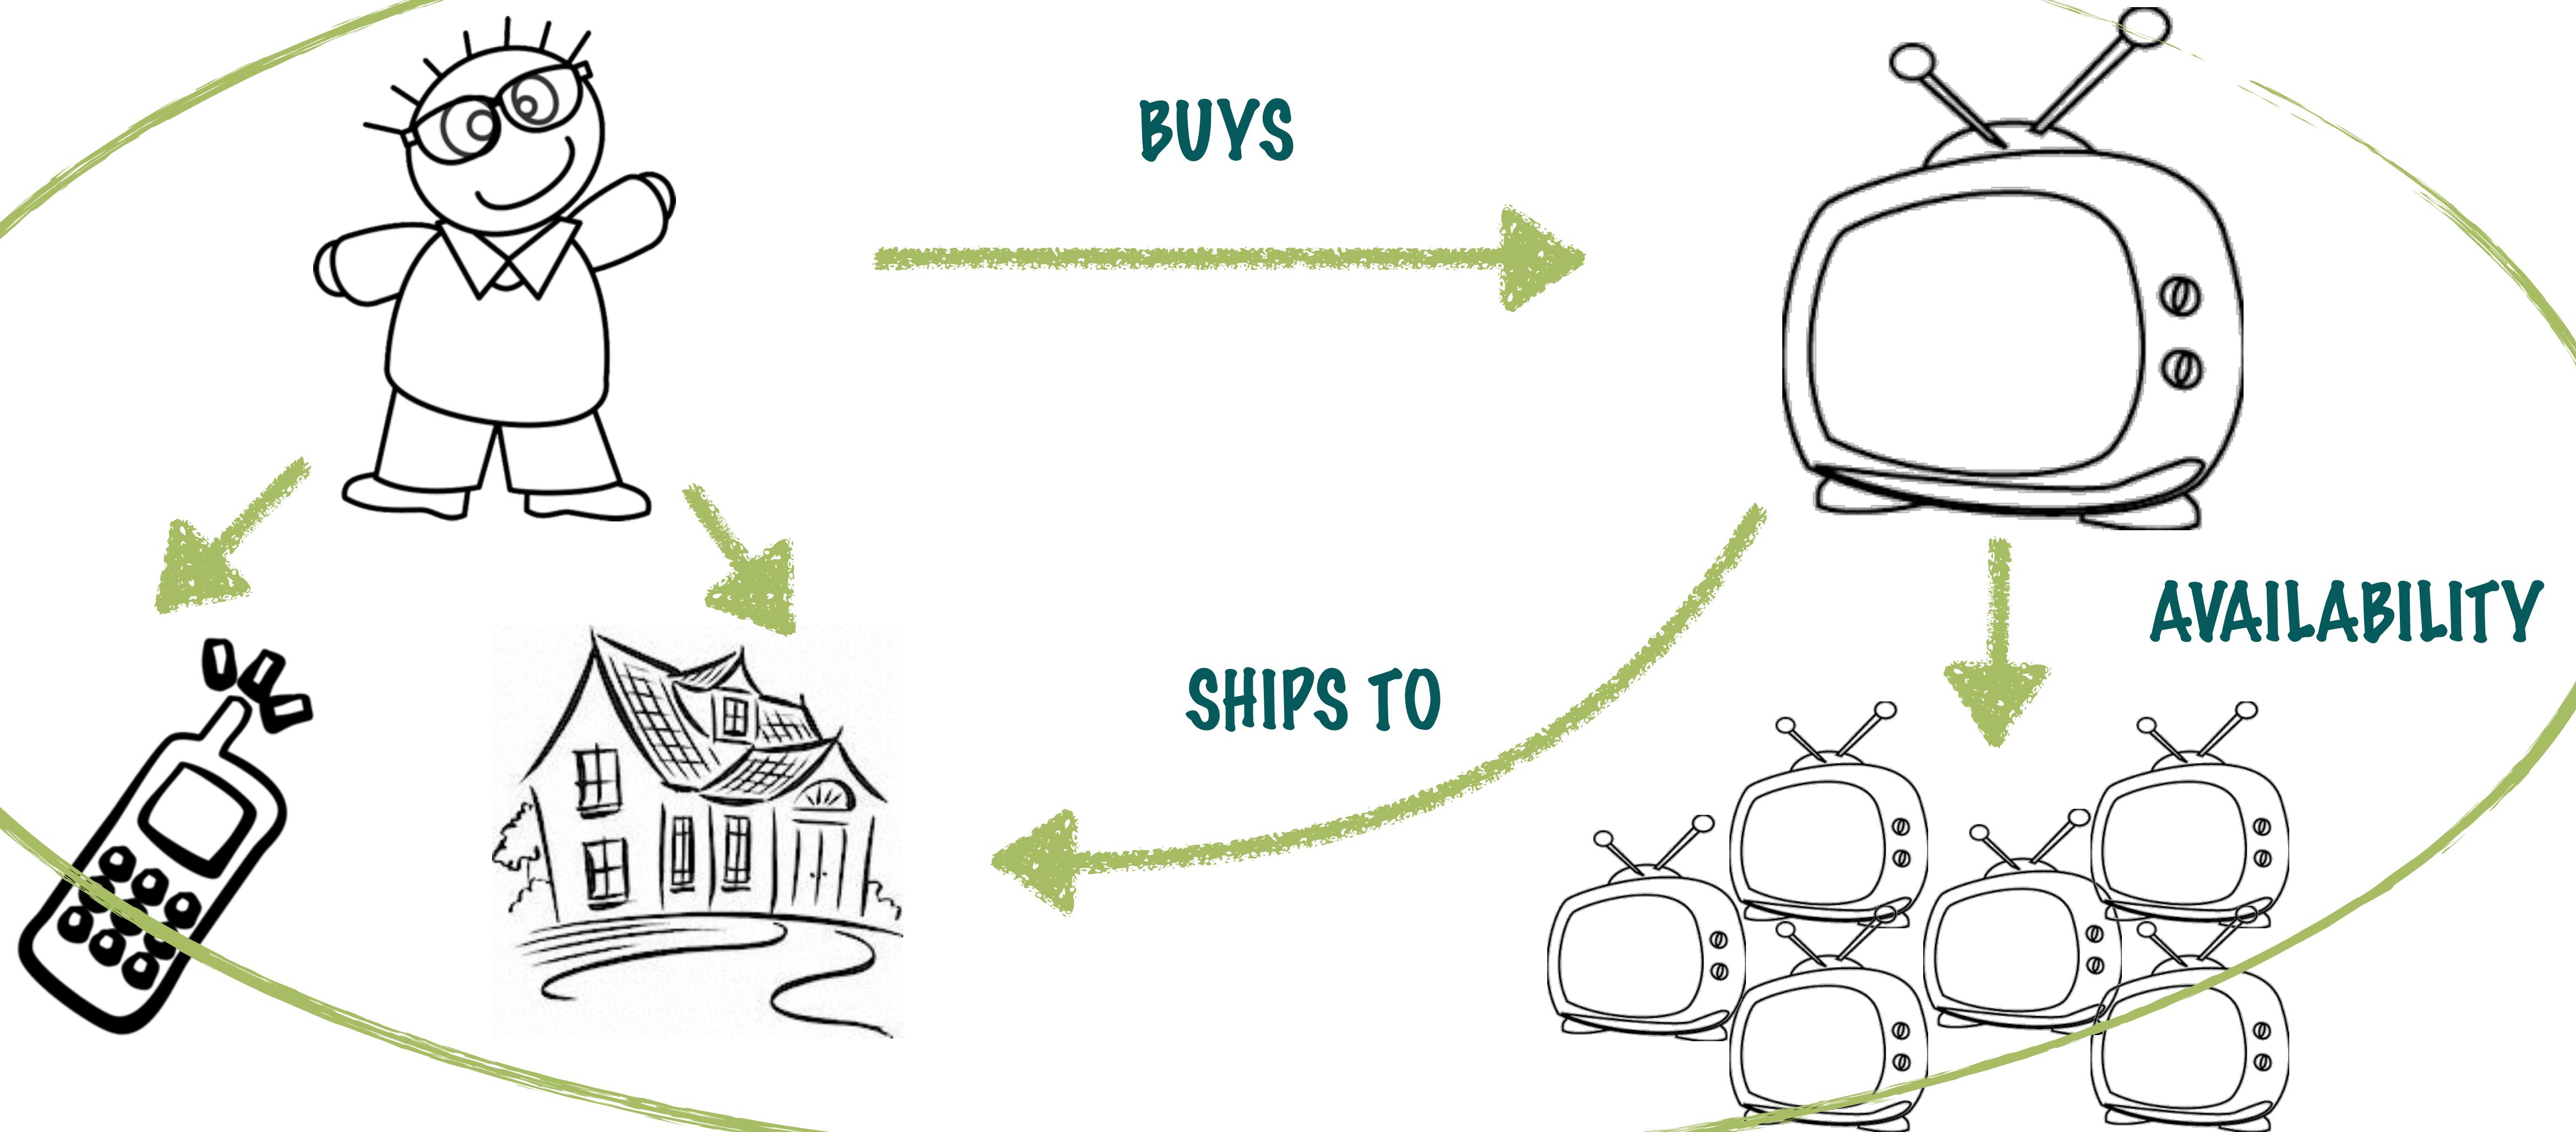

IT KNOWS WHETHER THE PRODUCT YOU'RE LOOKING FOR IS AVAILABLE - KEEPS TRACK OF INVENTORY

ONCE YOU BUY SOMETHING IT TRACKS THIS PIECE OF INFORMATION AND THE STATUS OF YOUR ORDER FROM PACKAGED, TO SHIPPED TO DELIVERED

IT STORES THIS INFORMATION FOR A LIFETIME

WITH THIS INFORMATION IT CAN POWER PERSONALIZED SEARCHES, RECOMMENDATIONS AND WHOLE BUNCH OF STUFF WHICH MAKES YOUR USER EXPERIENCE AWESOME

LET'S IMAGINE THE INFORMATION THIS SYSTEM HAS TO WORK WITH

LET'S IMAGINE THE INFORMATION THIS SYSTEM HAS TO WORK WITH

NAME

CUSTOMER NAME
PRODUCT NAME
QUANTITY
TIMESTAMP

WHAT DO WE WANT THE ORDER MANAGEMENT SYSTEM TO DO?

WORK CORRECTLY...

WELL, YES BUT WHAT DOES CORRECTLY MEAN?

ALLOW AN ORDER TO BE PLACED
ONLY WHEN THERE IS AVAILABLE
INVENTORY

ENSURE THE REDUCTION IN
INVENTORY IS EQUAL TO THE NUMBER
OF ORDERS FOR THAT PRODUCT

REDUCE THE AVAILABLE ITEMS ONLY
WHEN THE ORDER WAS SUCCESSFULLY
PLACED

HAVE THE CORRECT AND VALID
STATUS FOR THE ORDER

INCLUDE THE CORRECT AND VALID
PRODUCT IN THE ORDER

ASSIGN THE ORDER TO THE CORRECT
AND VALID CUSTOMER

WHAT DO WE WANT THE ORDER MANAGEMENT SYSTEM TO DO?

WE'RE NOT DONE YET, THERE'S MORE!

NOT LOSE INFORMATION... EVER

IT'S BACKED UP IN THE CASE OF
CATASTROPHIC FAILURES

RECOVER FROM FAILURES

GET BACK INTO A SANE STATE
WHEN RECOVERING FROM
ERRORS

BE SECURE

NOT EXPOSE INFORMATION TO
THOSE WHO DO NOT HAVE THE
AUTHORITY

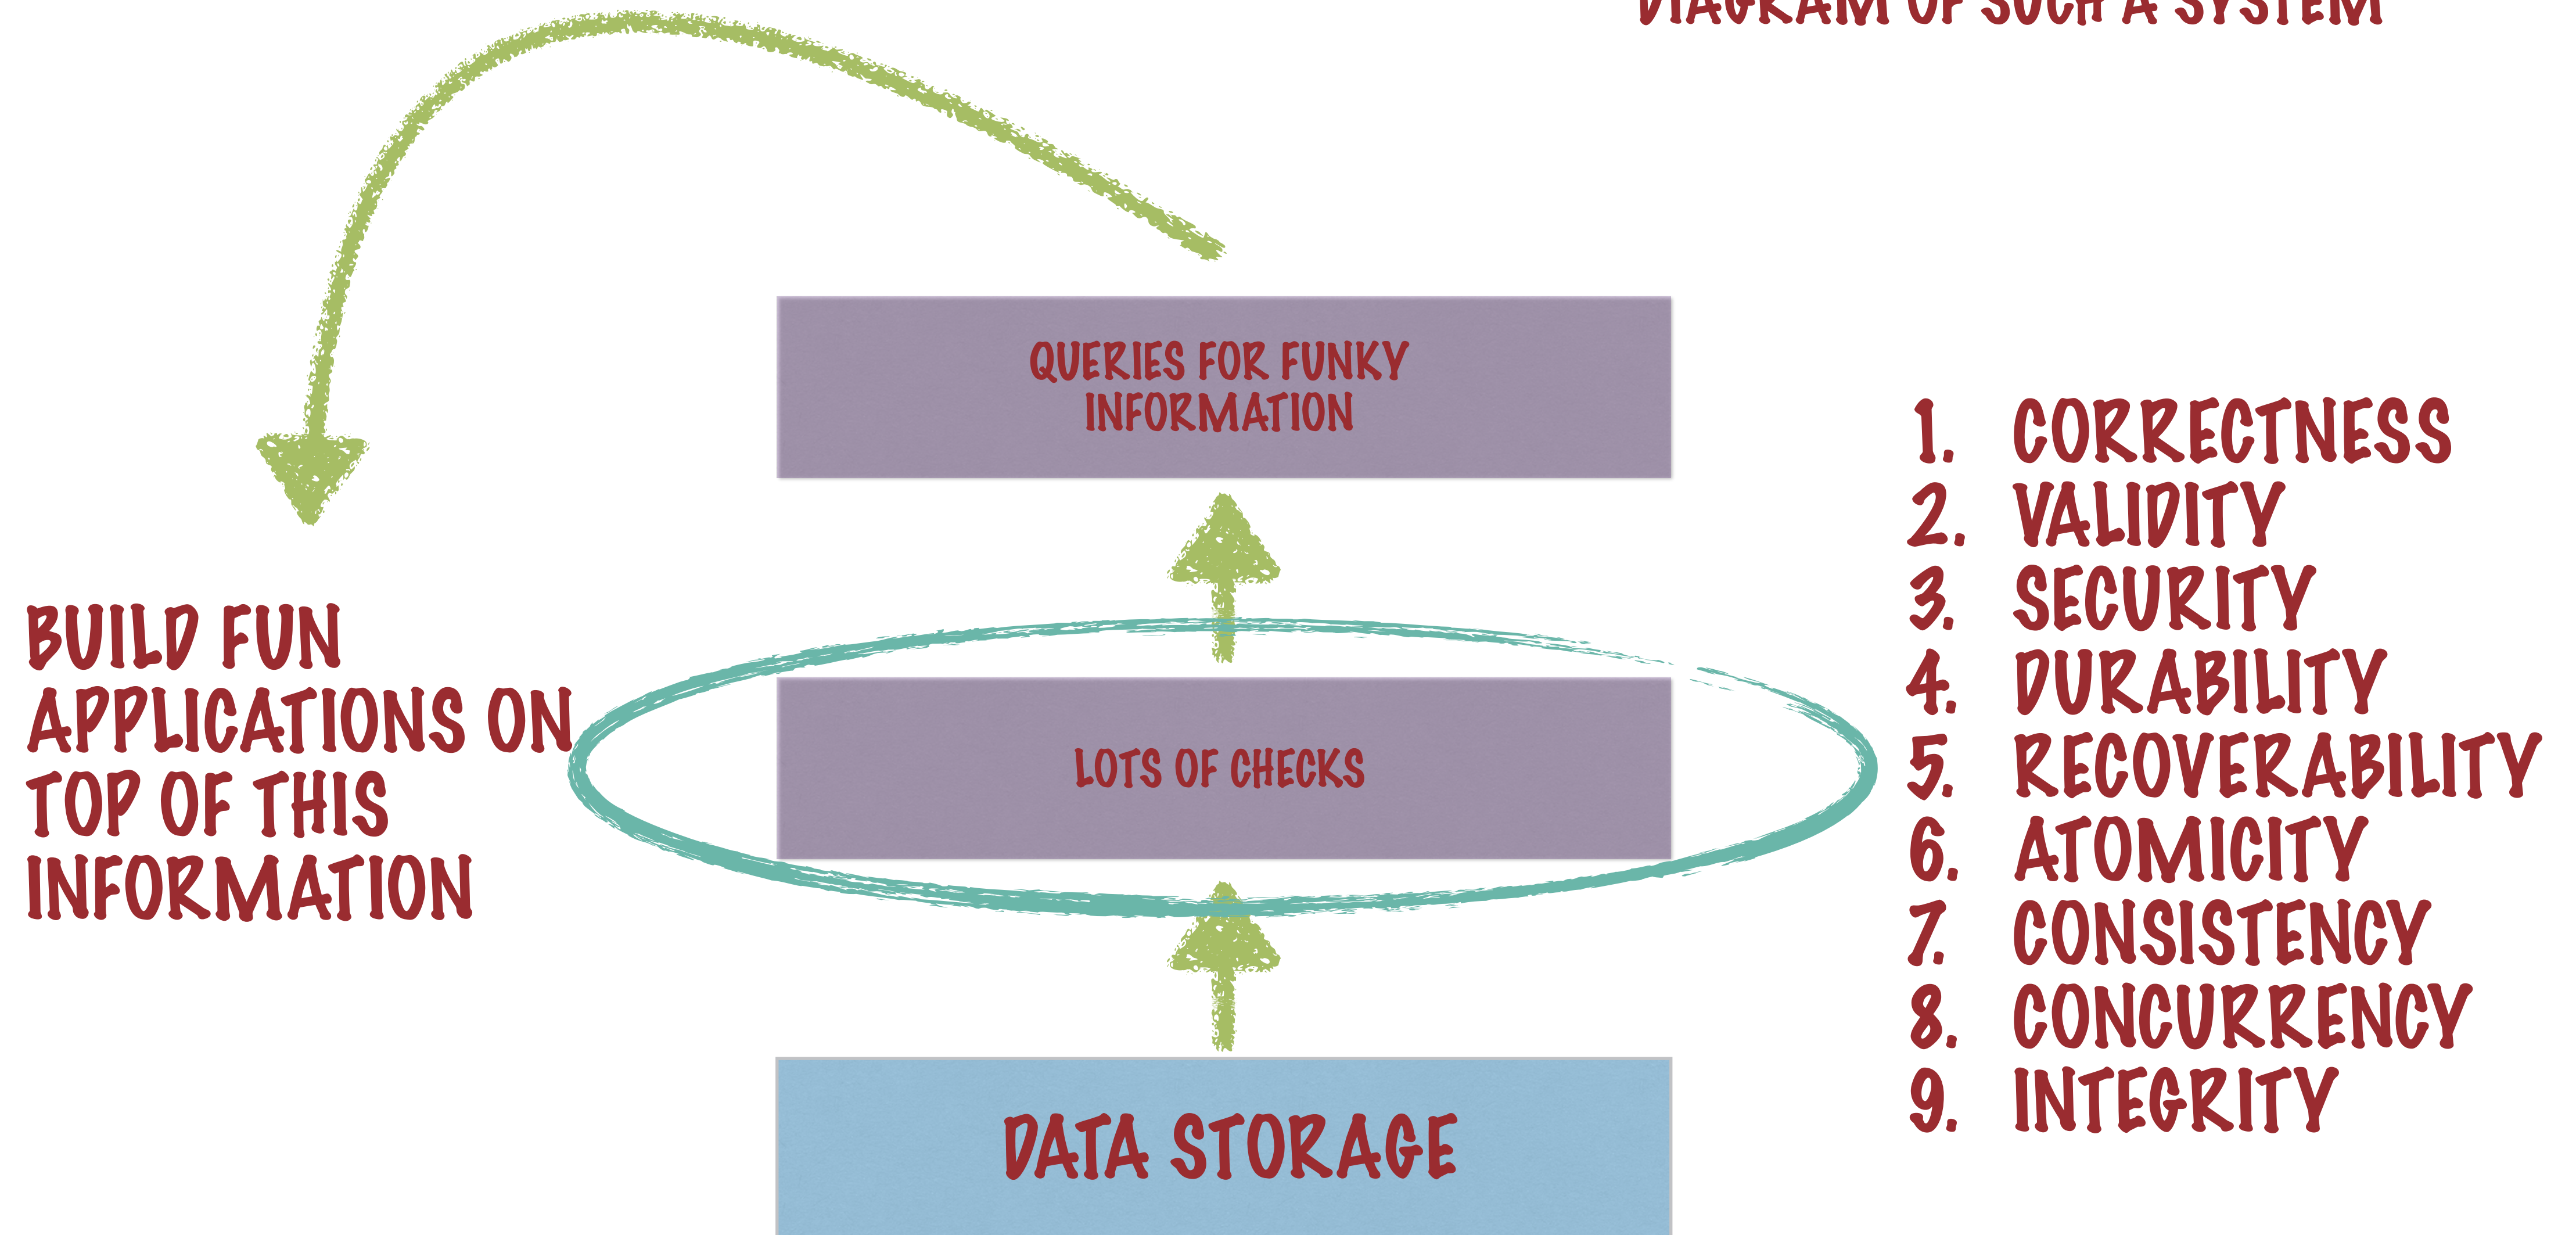

ALLOW MULTIPLE PEOPLE TO
ACCESS AND MODIFY DATA
AT THE SAME TIME

THE DATA SHOULD STILL MAKE
SENSE TO EVERYONE

THAT IS A FORMIDABLE LIST
OF REQUIREMENTS

THAT IS A FORMIDABLE LIST OF REQUIREMENTS

CONSIDER THE OVERALL BLOCK
DIAGRAM OF SUCH A SYSTEM

THAT IS A FORMIDABLE LIST OF REQUIREMENTS

NOW SUPPOSE WE WANT TO BUILD UP
A COMPLETE DIFFERENT SYSTEM
FROM THE SAME DATA - THE "SUPER
AWESOME SYSTEM"

QUERIES FOR FUNKY
INFORMATION

QUERIES FOR SUPER
AWESOME INFORMATION

LOTS OF CHECKS

LOTS OF CHECKS

THESE CHECKS SHOULD NOT BE
REPLICATED IN EVERY SYSTEM!

DATA STORAGE

THEY RELATE TO THE DATA AND
SHOULD BE CLOSELY TIED TO IT

THAT IS A FORMIDABLE LIST OF REQUIREMENTS

THE DATABASE MANAGEMENT SYSTEM

DBMS

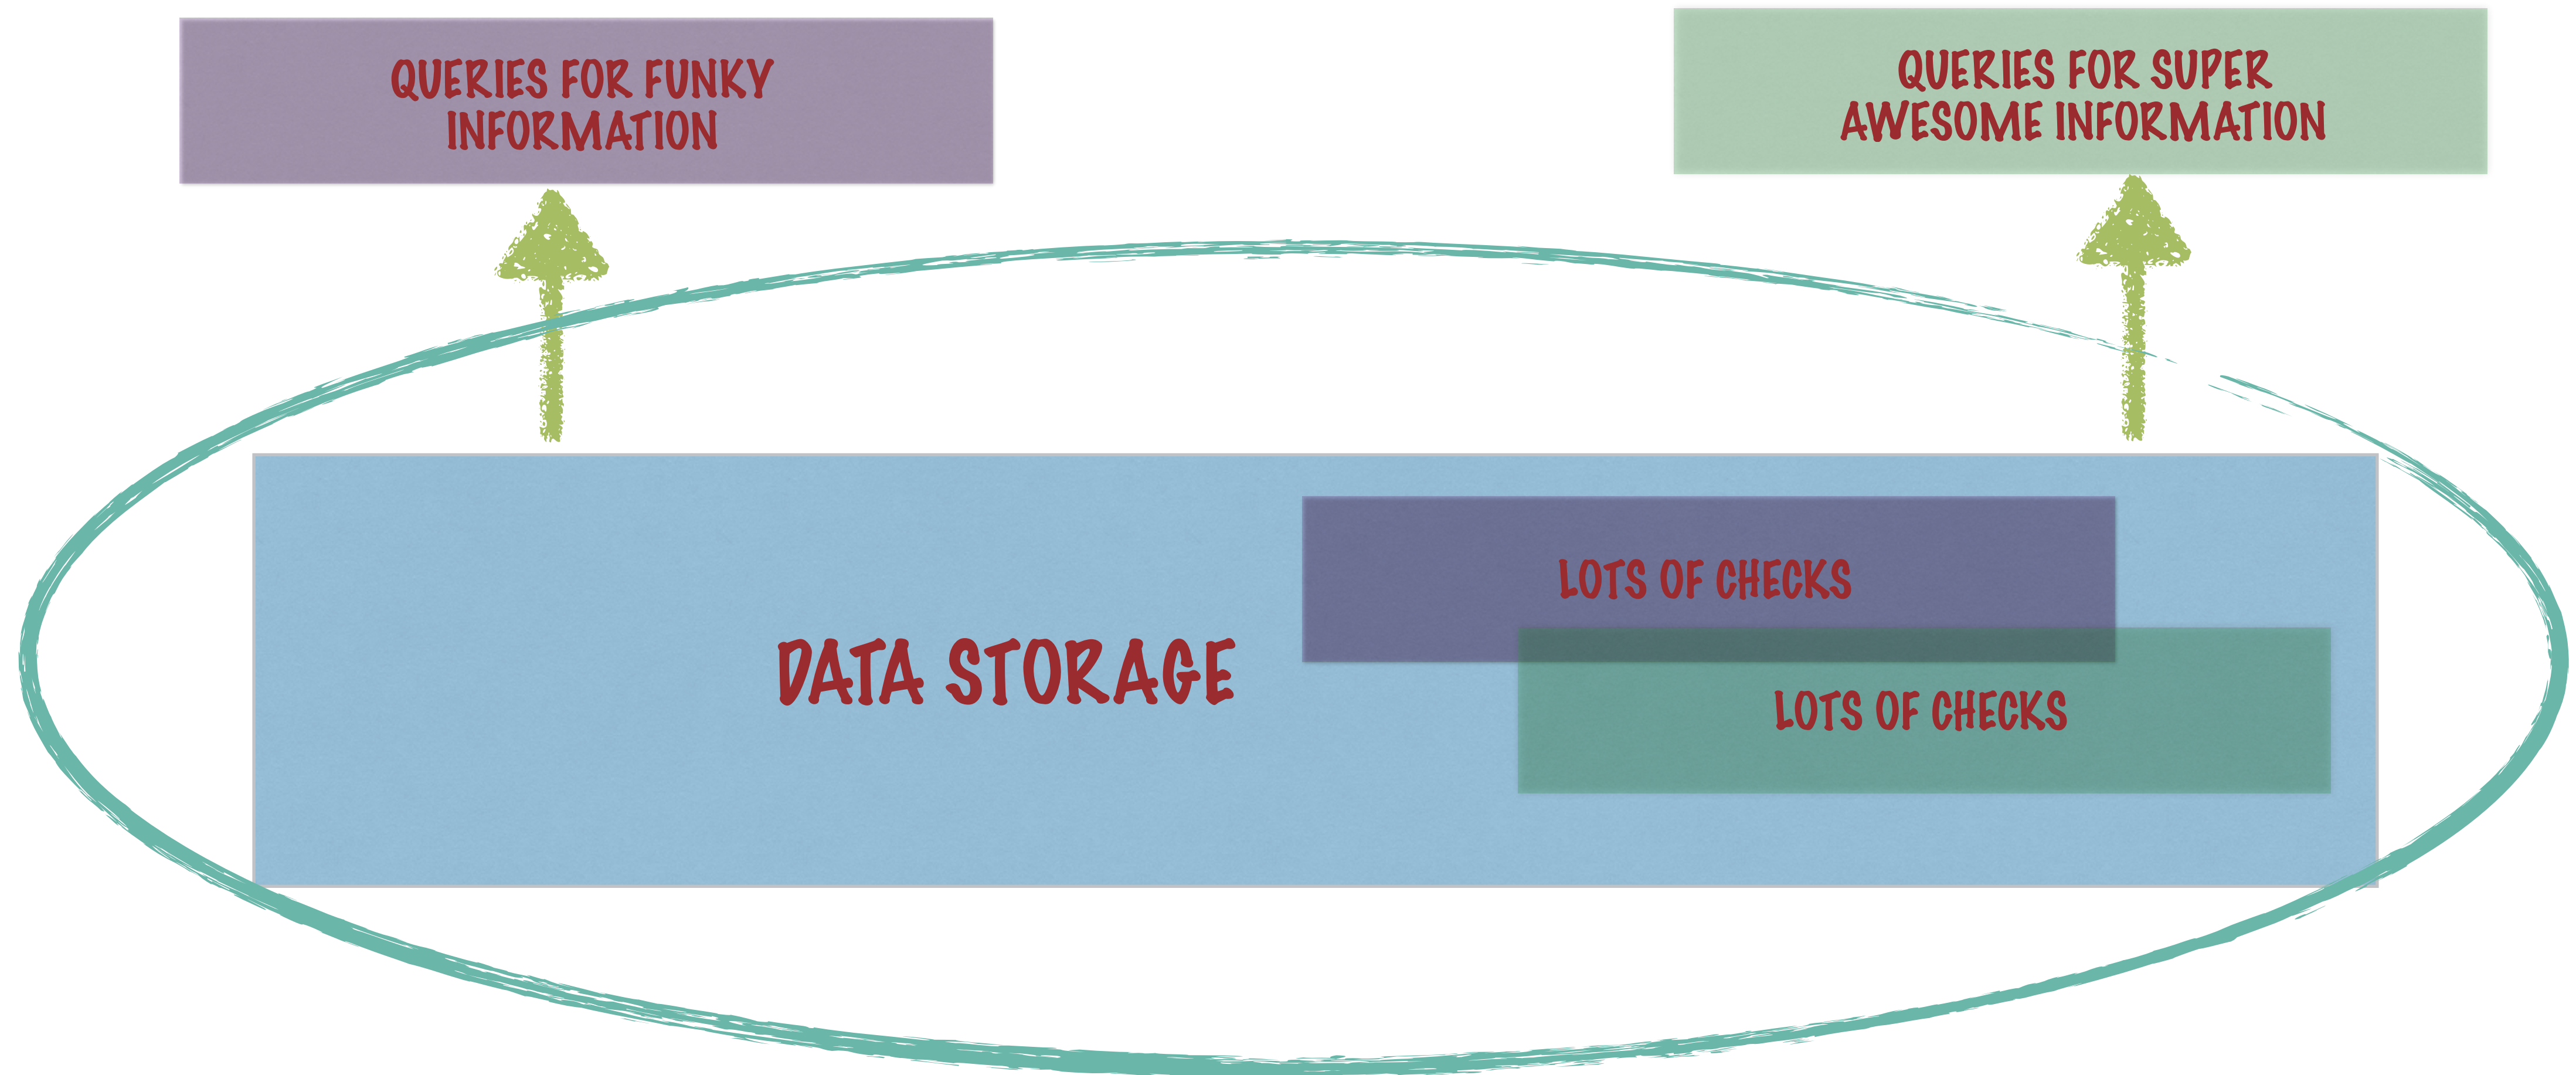

QUERIES FOR FUNKY
INFORMATION

QUERIES FOR SUPER
AWESOME INFORMATION

DATA STORAGE

LOTS OF CHECKS

LOTS OF CHECKS

DEFINITION OF A DBMS

A database is a collection of structured data, an
abstract representation of some domain

SOMETHING IN THE
REAL WORLD

A database management system is a complex piece of software
that sits in front of a collection of data and mediates access to the
data guaranteeing many properties of the data and the access

ALL THE CHECKS
